What do you think about our plans for our other projects and activities?: The current preferred option for a second bridge across the Ashburton river I believe is short sighted and will not meet the needs of the town in the future. By siting the bridge at the end of Chalmers Ave they divide the town in 3 sections, a current councilor as already raised a concern about continuing to put more traffic down the current state highway and cutting Ashburton in 2. Also this would put more traffic through a residential area. This maybe a good time to consider a longer term solution and look at a bypass road around the town which could be funded 100 percent by Transit NZ
