

Do you wish to speak in support of your submission at the hearing?: Yes

I am able to attend:

I intend to attend:

Would you like to be added to our database to be notified of future consultations?: Yes

Your Details

Full Name: Richard John Rollo Warburton

Do you agree with our preferred option or do you support another option?

Drinking water meters: Don't install meters

Let us know why:

A few people could easily find "the missing 50%", whereas meters will cost millions, and ongoing should council sell water services, this will be an ever increasing cost. Sort out the supply, gauge usage and requirements based on the number of new subdivisions, and plan accordingly, like a good business.

Elderly Persons Housing: Self-sustaining in 2 years - our preferred option

Let us know why:

Community housing is a given to support those who fall below a line. As a community supporting such people, this keeps them in our community and will no doubt aid in lowering mental health issues. Kiwi build type opportunities?

What do you think about our plans for our other projects and activities?:

Essential services are your domain. Ask yourself how many of the people employed within council are that. If you have numbers within the organisation, ask why? Ditch projects that are for the upper minority, that can easily help themselves (read your poor effort with an art gallery) And during the next election period, tell people what you need in terms of personal, qualifications, so you can be a bit more confident for your future predictions of community need. You set out a plan, therefore you should be accountable for that plan, so community interaction should be a must during that plan period. How will you interact with the community during that period, and how will you be accountable as an organisation should you not meet the targets you set?
