Do you think we should decrease our day-to-day levels of service to reduce the average rate increase? :	No
Why / Why not?:	I have concerns about the reduction of your current levels of service. The drinking water/storm water expenditure is necessary. I can see some expenditure that could be parked (EA wall and pool expansion and CBD Barring Square redevelopment). But - I expect I am a minority - I'd just prefer to wear the rate rise and retain normal service levels. Get this stuff done.
If so, what should we do less of?:	
2	
Do you agree with using \$1.7 million from our forestry reserve to pay for major roading repairs?:	Yes
Why / why not?:	This will still leave a credit of over 3 million in the Forestry accounts. This seems reasonable.
