

Do you wish to speak in support of your submission at the hearing?: No

I am able to attend:

I intend to attend:

Would you like to be added to our database to be notified of future consultations?: No

Your Details

Full Name: Geoff Corbett

Do you agree with our preferred option or do you support another option?

Drinking water meters: Don't install meters

Let us know why: The installation of these meters will become a revenue collecting source for our local council and Ecan. If the water leakage in our town is as bad as you say it is a simple underground radar or xray should be able to find the leaks from the surface and be repaired.

Elderly Persons Housing: Self sustaining in 7 years

Let us know why: With all charges compounding between now and 7 years, I would doubt that the councils figures of self sustaining in 7 years would be correct.

What do you think about our plans for our other projects and activities?: The domain redevelopment should be stopped completely saving some millions of dollars that includes all Ashburton domain development should be stopped. Baring square east upgrade should be stopped saving a further \$3.3m. Ashburton second bridge should be left to the NZTA to develop and build on their highway network [because if Ashburton rate payers have to pay for this bridge I expect we will be required to pay for a new bridge over the Rakaia and Rangitata rivers as well which will be quite detrimental to the rate payer.] The library and civic center at \$49m even with some government funding will have excessive overruns so the council need to guarantee its fixed price of \$49m because this is an extravagant and unnecessary building. The council needs to concentrate on sewage, roading, rubbish collection, recycling, community water and support community groups at fundraising activities i.e working bees etc other than giving rate payer money for grants to support their activities. I would like my submission to be read out at the hearing by the chairman.
