

Do you wish to speak in support of your submission at the hearing?: No

I am able to attend:

I intend to attend:

Would you like to be added to our database to be notified of future consultations?: Yes

Your Details

Full Name: bruce corah

Do you agree with our preferred option or do you support another option?

Drinking water meters: Spread over 3 years - Our preferred option

Let us know why:

Elderly Persons Housing: Self-sustaining in 2 years - our preferred option

Let us know why:

What do you think about our plans for our other projects and activities?: The second bridge --- Whatever is the eventual preferred location it must be considered that the idea is to divert heavy traffic away from SH 1 Ashburton & Tinwald and not use the existing West St / East St / Melcombe St as possible avenues of diversion. Take the traffic via Chalmers Ave as originally mooted or Trevors Rd or even Digby's bridge .A loop diversion can be the only option (a perfect example of this is the ring road in Geelong Victoria which has been a huge success) This is not the time to bow to pressure and then have future generations debunking the decision. Do it right the first time, as using existing road structures through Ashburton & Tinwald with modifications and the wrong bridge location will have serious traffic ramifications down the line. This is our 1 and only chance to get this right.
